EDUCATION

The University of Illinois at Urbana – Champaign

College of Engineering

BACHELOR OF SCIENCE IN CIVIL ENGINEERING, May 1997

BACKGROUND AND ADDITIONAL INTERESTS

I have enjoyed playing at various levels as a child and continue to play and improve as an adult. As an avid cyclist I raced for The University of Illinois Bicycle Racing Club for two seasons. I raced as a category 2 cyclist in both road and track disciplines for several years beyond college. I have traveled all over the Midwest to various races, placing as high as 13th in the Pro/1/2 Illinois state criterium championship. My children having reached the age that I began playing soccer has drawn me back into the game that I started playing as a child. I have turned my attention back to soccer and have found coaching and refereeing children to be very enjoyable and rewarding. As a referee assignor I have been very successful in improving the processes of getting referees into the USSF program and getting them assigned to matches for the clubs for which I assign. I enjoy the challenge of solving problems and incorporating technology to solve those problems.
